

Understanding Estimated Breeding Values (EBVs)

National Advice Hub
T: 0300 323 0161
E: advice@fas.scot
W: www.fas.scot

Date: Tuesday 24 January 2017

Time: 11am – 3pm

Venue: Northern Hotel, 2 Clerk Street, Brechin DD9 6AE

SAC Consulting invite you to a practical workshop for the commercial beef farmer

The workshop provides active participation to help producers gain a better understanding and develop their ability to select bulls for specific purposes on the farm. Potential buyers will also benefit from the day as we will work with catalogues for imminent bull sales.

EBVs provide information which help commercial beef farmers identify bulls which breed calves that maximise returns for the store producer and finisher. The information can also assist in selecting bulls for their ability to provide good milky replacements and those that are best to go on heifers to avoid calving difficulties.

Book your place on the www.fas.scot website or call SAC Consulting Forfar t: 01307 464033 e: FBSForfar@sac.co.uk

Free Event and Lunch provided

Workshop will also include session on Understanding Health Cards at Sales (Johnes and BVD Status)

Trainers:
Gavin Hill
SAC Consulting Beef Specialist
Ian Pritchard
SAC Consulting Veterinary Services
