agroninja beefie™

stressless

With agroninja beefie™ cattle can be measured from a safe distance (2-6 meters) without bothering the animal.

cost-effective

With agroninja beefie™ cattle can be save labor costs, scale maintenance cost accidents and the weight loss caused by stress.

quick

The measuring process can be taken in the barn or on the grazing field, without moving the cattle. The process takes only 30-40 seconds per animal and stored on the device or in cloud. It is more time saving than the usual methods. Works offline.

agroninja measure application

- Measure physical dimensions:
 - Height
 - Length
 - Width
- Measure and calculate Frame Score
